

Additional information 1.

Dear Tenderer!

The **Hungarian Meteorological Service** (1181 Budapest, Gilice tér 39.), as the contracting authority, provides the following answers to the requests for additional information received in his public procurement "**Acquisition of new lightning locating sensors and new central units**".

1. Question: We intend to participate at the tender and we already prepare the according documents, but currently we do not have complete translations of the tender documents. Since we later need also to translate our answers back into Hungarian language, we would like to ask for an extension of the deadline for submitting the answer to the tender. Could you please describe the official way and the right contact for requesting such a time extension?

1. Answer: Due to the deadlines for the use of the resources available to finance the procurement, the contracting authority does not intend to extend the deadline for the submission of tenders.

2. Question: For registration, is there a deadline other than the final date of submission (18/04/2018)?

2. Answer: It is possible to send the registration form to the contracting authority until the deadline for the submission of tenders, 18th of April 2018.

3. Question: There are many crossed out lines in the document "KD_mellekletek_OMSZ_Villamlokalizacio.doc" – must these parts not be answered?

3. Answer: The contracting authority crossed-out the parts in the European Single Procurement Document („KD_mellekletek_OMSZ_Villamlokalizacio.doc" – Annex 4.) that need not to be completed by the tenderers in the present public procurement. Thus, the crossed-out parts need not be completed by the bidders.

4. Question: Must the price for the optional material summed up for the full offer price ("KD_mellekletek_OMSZ_Villamlokalizacio.doc" – Page 5.)?

4. Answer: Yes, the price (full offer price) on the reading sheet must also include the price of the optional items, as indicated on page 5. of the document "KD_mellekletek_OMSZ_Villamlokalizacio.doc", namely, the total price = offer price for basic items (System of three lightning locating sensors and one central unit and related services) + offer price for optional items (10 lightning locating sensors) + offer price for optional item (1 reserve central unit)

5. Question: We would like to ask for a short description of the available infrastructure/locations for installation of the 3 sensors, this would help us to estimate the complete material for installations (e.g. outdoor installation vs indoor installation)

5. Answer: Sensors to be purchased are to be installed outdoors.

We would like to draw your attention to the obligation to comply with all elements of the notice and to indicate that this information is not qualified as a modification of the terms of the call for proposals or an exemption from fulfillment of any of its rules

Additional information is provided by the contracting authority in English also, solely for information purposes. If there is a discrepancy between the Hungarian and English documents, the information in Hungarian is considered official.

We wish you success in making your offer.

Budapest, 5th of April, 2018.

.....

dr. Poroszkai-German Gabriella

Acting on behalf of the contracting authority
