

Additional information 2.

Dear Tenderer!

The **Hungarian Meteorological Service** (1181 Budapest, Gilice tér 39.), as the contracting authority, provides the following answers to the requests for additional information received in his public procurement "**Acquisition of new lightning locating sensors and new central units**".

6. **Question:** The new lightning locating sensors to be purchased are to be installed in place of existing sensors? If yes, please define the coordinates (SAFIR) of existing lightning locating sensors, so we can create a map for the lightning detection system covering Hungary. If not, please provide the coordinates of your planned locations.

6. **Answer:** The new lightning locating sensors, according to the Public Procurement Documents do not need to be installed, they must be delivered to the contracting authority's premises. The locations of the antennas have not been determined yet.

7. **Question:** Do you want to use the current SAFIR publishing software or does the offer need to include new publishing software?

7. **Answer:** According to the Public Procurement Documents, the Offer must include a new publishing software.

8. **Question:** What format does the data require from the new system so that they can be displayed in the current display system?

8. **Answer:** The format of data from the new system can be anything, the contracting authority has made no restriction concerning file formats. As described in the Public Procurement Documents, the provision of a detailed description of the data formats can be evaluated by extra points.

9. **Question:** As the system we are to offer is compatible with other systems, and since a European-level network of lightning detectors has been built up, the data of lightning detection systems in neighboring countries is available free of charge. Is there any way or intent to cooperate with these countries? If so, we can provide full coverage with three lightning detection sensors.

9. **Answer:** The contracting authority would like to acquire a network which is working independently from any other country's system. The number of sensors to be purchased in addition to the basic items is to be determined by the contracting authority.

10. **Question:** As the coverage of 93 000 km² in the tender documentation is not possible with 3 sensors therefore, does national coverage mean that this condition should be provided with the installation of the optional 10 lightning detectors?

10. Answer: Yes, the coverage of 93 000 km² should be provided with the installation of the basic items and the optional items. The number of sensors to be purchased in addition to the basic items is to be determined by the contracting authority.

11. Question: Do you want the old lightning detection system to be demolished??

11. Answer: The contracting authority does not request the demolition of the old lightning detection system.

12. Question: I am contacting you to let you know our interest and to ask you if it would be possible for us to participate. We would like to know too if it would be accepted to deliver the tender documents in English

12. Answer: The documents of the public procurement procedure can be accessed via the link below: <https://kozbeszerzes.met.hu/VillamLokalizacio/>

The official language of the public procurement procedure is Hungarian, the Public Procurement Documents are available in Hungarian only and bids must be submitted in Hungarian. All documents submitted in foreign language must be translated and submitted in Hungarian (attested translation is not required) as part of the offer.

13. Question: Do we have to submit the European Procurement Document (please see attachment) in advance to the submission of our complete answer to the tender? Furthermore, do we need to provide a Hungarian translation of this document?

13. Answer: The official language of the public procurement procedure is Hungarian. All documents submitted as part of the tender, including the Single European Public Procurement Document, which is a mandatory part of the tender, must be handed in in Hungarian

We would like to draw your attention to the obligation to comply with all elements of the notice and to indicate that this information is not qualified as a modification of the terms of the call for proposals or an exemption from fulfillment of any of its rules

Additional information is provided by the contracting authority in English also, solely for information purposes. If there is a discrepancy between the Hungarian and English documents, the information in Hungarian is considered official.

We wish you success in making your offer.

Budapest, 10th of April, 2018.

.....

dr. Poroszkai-German Gabriella

Acting on behalf of the contracting authority
